Woodford Utility Yard Hydrants are intended for irrigation purposes and designed for use where year-round availability of water is required. Sturdy construction make these hydrants rugged and dependable. Accidental damage and vandalism are minimized. Hydrants are available with choice of manual close lever handle or wheel handle.

#### SUGGESTED USES:

Auxiliary fire fighting; filling fire-pond reservoirs; main shut-off hydrant for irrigation systems; to connect to 3HP contractor pumps where a permanent outlet is required.

#### **Features:**

- Automatic draining occurs through ½" NPT drain hole when hydrant is shut off to prevent freezing.
- Outlet can be located at any height above ground level. Adjust bury depth accordingly.
- All working parts are removable through the top of the hydrant.
- Lever handles can be easily removed to prevent unauthorized usage.
